

D6.5 Virtual Campus Hub final conference

This document represents the deliverable 'D6.5 Virtual Campus Hub final conference' of project Virtual Campus Hub. The due date for the deliverable was moved from project month 18 to month 24 in connection with the 1st periodic review in December 2012.

A proposition for a change of the deliverable content was accepted in April 2013 (see also the annex of this document). It was agreed that the project team should participate in a series of international conferences instead of organising a separate Virtual Campus Hub conference. This decision was made in order to reach more stakeholders from the various disciplines that the project embraces (i.e. E-infrastructure, education, research, incubation and innovation, renewable energy).

The project team has participated actively in the following international events:

- XXI Biannual Symposium on Measuring Techniques in Turbomachinery, March 22, 2012 (presentation by KTH)
- Terena REFEDS workshop, September 5, 2012 (oral presentation by DTU)
- Terena VAMP workshop, September 6-7, 2012 (oral presentation by TU/e, all partners were present)
- Surfnet Relation Days, October 4, 2012 (oral presentation by TU/e)
- SEEIT workshop, October 25, 2012 (oral presentation by DTU)
- 10th e-Infrastructure Concertation Meeting, March 7-8, 2013 (lightning talk by DTU)
- SEEIT workshop, April 25, 2013 (poster presentation by DTU)
- TERENA Networking Conference, June 3-6, 2013 (TU/e was present, abstract submitted but not selected for presentation)
- EUNIS, June 12-14, 2013 (oral presentation by TU/e)
- EDULEARN, July 1-3, 2013 (two oral presentations and a proceedings paper by DTU)

Participation in the following international events is planned:

- TERENA VAMP workshop, September 30-October 1, 2013 (oral presentation by TU/e)
- SEEIT workshop, November 4-5, 2013 (oral presentation by DTU)
- ASME TurboExpo in Dusseldorf, June 16-20, 2014 (scientific paper and oral presentation by KTH in the education track of the conference. Abstract accepted, paper submission by October 21st).

Mini-conference during the final project meeting of Virtual Campus Hub:

The final project meeting of Virtual Campus Hub was held on September 5, 2013 at DTU. The first part of this meeting was open and a number of Danish stakeholders in the project were invited (e.g. from DTU, WAYF, and UNI-C). Two stakeholder representatives (Mads Freek from WAYF and Charlotte Hasager from DTU) came to the meeting and provided their feedback to the project team after the main outcomes of Virtual Campus Hub had been presented.

On behalf of the project team,

Merete Badger, Technical University of Denmark
